Underground Mapping

## CASE STUDY

Site: **Taunton Firepool**  
Survey: **Utility Mapping & GPR Survey**  
Date: **January 2010**

A detailed and comprehensive survey of the former cattle market in

Taunton and surrounding areas. A major element of the survey was to locate the route of a large underground culvert approximately 300m in length. This was successfully mapped using GPR and was further calibrated with a small scale trial pitting operation.
